

Clean Hands— Healthy People

*“Hand washing
is the single most
important means of
preventing the
spreading of
infection.”*

*Centers for Disease Control—
Atlanta, GA*

Good Health....in 30 Seconds

- **Wet Hands Using Warm, Running Water**
- **Use Soap and Scrub for 20 seconds. Practice by singing Row, Row, Row Your Boat twice or counting slowly to 20.**
- **Rinse with Warm, Running Water**
- **Dry with a Paper Towel**
- **Use the Towel to Turn Off the Faucet and Open the Bathroom Door**

Wash Your Hands:

- Before you eat
- Before preparing food
- After using the bathroom
- After coughing /sneezing
- After playing with pets
- After changing diapers
- After carrying the garbage or trash

WASHINGTON STATE UNIVERSITY
 EXTENSION

Extension programs and employment are available to all without discrimination. Evidence of noncompliance may be reported through your local extension office.

Good Health...

...In 6 Easy Steps!

1

Wet

- ▶ Wet hands using warm, running water
- ▶ Wetting hands helps the soap to work.
- ▶ Soap works best with warm water.
- ▶ Washing with cold water is better than not washing at all, but warm water is best.

2

Soap

- ▶ Water and soap do not kill germs- they do help make germs slippery and get washed off your hands.
- ▶ You do not need to use antibacterial soap. Plain soap is just fine.
- ▶ If only cold water is available, use a soap that lathers easily. Liquid soap works well.

Good Health... ...in 6 Easy Steps!

3

Wash

- ▶ Scrub for 20 seconds.
- ▶ 20 seconds is the time it takes to sing "Row, Row, Row Your Boat" twice.
- ▶ Taking the time to scrub is important for loosening germs
- ▶ If only cold water is available, scrub longer than 20 seconds.

4

Rinse

- ▶ Once the germs are loosened, they need to be washed down the drain.
- ▶ Rinse with warm, running water.
- ▶ Communal basins or tubs of water where water is used by more than one person, are not adequate for rinsing.

5

Dry

- ▶ Dry with a clean paper towel
- ▶ Drying with a clean towel helps to remove more germs.
- ▶ Pat your skin instead of rubbing to prevent chapping and cracking.
- ▶ If towels are not available it is okay to air dry your hands.
- ▶ Apply hand lotion after washing to help prevent dry skin. It is harder to wash off germs when the skin on your hands is dry and cracked.

6

Turn Off Water

- ▶ Some germs can live for 2 or more hours on surfaces.
- ▶ After washing, it is important not to get germs from faucets, handles, doors, or any other surfaces back on your hands.
- ▶ Use the towel to turn off the faucet and open the bathroom door.
